Well Buddy

Multistage Submersible Pump

Model	KG	HxWxL	LM/HM	P1	P2	In (A)	T	Depth
Well Buddy	16,9	520x200x235	143/45	1,31	0,84	5,8	0 - 40 °C	7

The Well Buddy is ready to be used in traditional wells, installation in home for pressurization, small scale irrigation systems, water deposits, water harvesting and collection tanks out of the box.

This pump is suitable for pumping clear water, with no suspended solids or abrasive materials. The maximum submersion depth is 7 metres.

The Well Buddy is made out of Stainless Steel and cast iron parts. Equiped with a float switch.

The Well Buddy's high delivery volume (143 l/min) combined with a high delivery head (45m) makes the pump suitable for a variety of irrigation applications.
